Lifestyles

One person's lifestyle: another person's life How do our choices impact on the Global South?

This year's theme emerges from the growing awareness within the churches of our choices impact on the world, and addresses the relationship between care for creation and care for humanity.

Through talks, theological reflections, workshops, discussion groups and worship the delegates will explore:

- Our use of natural resources – issues surrounding energy and extractive industries and the impact of our decisions on climate change.
- Our use of wealth – how we use our spending power in the marketplace to create negative or positive change in trading structures, investment, tourism.
- Our attitudes to growth and wealth – how do we define and measure growth and prosperity? Can we create sustainable North/South partnerships that work? What do Gospel-based alternative life styles look like?

The object of the conference is to help churches respond practically to these concerns through personal lifestyle choices, campaigning, theological reflection and worship.

So whether your knowledge is minimal or detailed, we invite you to join in learning more about and responding to the challenges facing the church and our planet.
